The following are prohibited: reprinting, reproduction, forwarding to unauthorized people and/or third parties, and translation, including partial, without written authorization from Automobili Lamborghini S.p.A.

This section explains how to disassemble:

- A) Disassembling the throttle bodies
- B) Disassembling the air intake manifold

A) Disassembling the throttle bodies

1. Detach the clamp (A-Fig. 1) connecting the air intake pipe (B-Fig. 1) to the throttle body (C-Fig. 1).
2. Disconnect the throttle body from the engine by unscrewing the 4 screws (D-Fig. 2) and detaching the connector (E-Fig. 2).

STOP Once the throttle body has been disassembled, it is advisable to replace the gasket on the engine before reassembling the throttle body. Therefore, do not reassemble the throttle body on the same gasket.

B) Disassembling the air intake manifold

Preliminary operations

- Disassemble the engine safety cover (081303).
- Disassemble the left side carbon bulkhead (081303).

Manifold disassemble

1. Disconnect the fuel delivery pipes (A-Fig.3).

Fig.3

2. Disconnect the fuel return pipes (B-Fig.4).
