This section explains how to disassemble:

A) Disassembling the right side member on the body

B) Disassembling the left side member on the body

A) Disassembling the right side member on the body

Preliminary operations

- Remove the rear seat cover (bottom) (086803).
- 1. Unscrew the screws securing the body side member (A-Fig.1) to the car using the free space created by the rear seat cover.
- Raise the car on the car lift (000000).
- Remove the 2 wheels on the right flank (front and rear wheels) (060103).
- Remove the rear element of the front wheel arch (082103).
- Remove the front element of the rear wheel arch (082103).

Fig.1

Side member disassembly

2. Unscrew the 2 screws (B-Fig.2) securing the conveyor to the side member, using the free space created by the rear element of the front wheel arch.
3. Unscrew the screw (C-Fig.2) securing the conveyor to the oil radiator, using the free space created by the front element of the rear wheel arch.
